Company: DEVjobs

Location: Manama

Category: computer-and-mathematical

Software Engineer @DeepL GmbH

Your role in the team

Facilitate the overall architecture of our business systems across teams, system owners and engineers.

Provide guidance on the architecture and its components through the commissioning and decommissioning of all services involved.

Ownership of revenue data management: Data architecture, governance, data protection, etc.

Provide hands-on technical leadership on projects with a size and scope of +5 teams

Helping teams plan and estimate activities

Supporting and challenging a realistic roadmap with team leads and product managers, challenging timelines and providing predictability of deliverables to the business.

Mentor, develop and coach other senior software engineers, engineering managers and business leaders.

Our expectations of you

Qualifications

Track record of influencing engineering organizations at staff+ level in a scaling and rapidly

changing environment.

Ability to work with high level of ambiguity to drive concrete solutions.

Proven track record of leading projects involving 4+ teams from a technical and organizational perspective.

Experience

Proven experience of developing highly scalable and available backend software systems at scale.

Preferably experience of integrating with 3rd party enterprise systems such as CRMs like Salesforce, Hubspot, Zendesk, (...).

Experienced in leading or significantly contributing to large migration projects.

Job Locations

Location Cologne

Nordrhein-Westfalen

Germany
