The role of a SystemsIntegrations Engineering Manager, Commercial Systems atCanonical

This engineeringmanagement role is an opportunity for a technologist with a passionfor Linux and Ubuntu to build a career with Canonical and drive thesuccess of the business. If you have an affinity for open sourcedevelopment, then you will enjoy working with some of the bestpeople in the industry at Canonical.

TheCommercial Systems unit has several areas of responsibility spreadacross six engineering teams, closely collaborating with otherengineering and business teams at Canonical. Services designed,developed, and operated by the Commercial Systems unit are at theheart of Canonical business and Salesforce plays an integral rolein it.

The Integrations team aspires tointegrate all business systems used at Canonical to ensure data reliably flows at the right time to the right place, and toautomate business processes across the company. The systems includepopular SaaS solutions such as Salesforce, NetSuite, Greenhouse,GSuite, and a few dozen others. To achieve this goal, we leveragePython and Go in combination with open source tools such as Airbyteand Temporal. Our work helps to make data-driven decisions, andincreases the efficiency of businessoperations.

We are looking for an engineering manager with prior software engineering experience, who strives for the highest engineering quality, seeks improvements, continuously develops their skills, and applies them at work. This is an exciting opportunity to work with many popular software systems, integrations technologies, and exciting open source solutions.

Location: This role will be based remotely in the EMEA region.

What Your Day Will Look Like

Lead, mentor, and hire a team of software engineers

Design and deliver engineering solutions leveraging Go, Python, and open source tools such as Airbyte and Temporal

Seek improvements to established processes, designs, and engineering solutions

Partner with business customers to understand their data and integrations needs

What We Are Looking For In You

Experience as a software developer in Python

Excellent understanding of integration patterns

Experience as a hands-on engineering manager or a team lead

Excellent verbal and written communication skills in English

Ability to collaborate remotely with a diverse set of team members and stakeholders, remain highly motivated, productive, and organized in a fully remote environment

Ability to travel to international destinations for one week at a time, approximately 2-4 times per year. Locations prior to the global pandemic included New York, Seattle, London, Cape Town, Budapest, Berlin, Montreal, and Brussels
