The role of a SystemsIntegrations Software Engineer, Commercial Systems atCanonical

This engineering roleis an opportunity for a technologist with a passion for Linux tobuild a career with Canonical and drive the success of thoseleveraging Ubuntu and open source products. If you have an affinityfor open source development, you will enjoy working with some ofthe best people in the industry atCanonical.

The Commercial Systems unit hasseveral areas of responsibility spread across six engineeringteams, closely collaborating with other engineering and businessteams at Canonical. Services designed, developed, and operated bythe Commercial Systems unit are at the heart of Canonical businessand Salesforce plays an integral role init.

The Integrations team aspires to integrateall business systems used at Canonical to ensure data reliablyflows at the right time to the right place, and to automatebusiness processes across the company. The systems include popularSaaS solutions, such as Salesforce, NetSuite, Greenhouse, GSuite,and a few dozen others. To achieve this goal, we leverage Pythonand Go in combination with open source tools, such as Airbyte andTemporal. Our work helps to make data-driven decisions, andincreases the efficiency of businessoperations.

We are looking for new colleaguesat all seniority levels, who strive for the highest

engineeringquality, seek improvements, continuously develop their skills, andapply them at work. This is an exciting opportunity to work withmany popular software systems, integrations technologies, andexciting open sourcesolutions.

Location: This role will be based remotely in the EMEAregion.
